

**43RD ERA (400 – 351 BC): 43RD SIGN ERIDANUS “JUDGMENT OF APOSTATES: FIRE”****STAR PROPHECY**

**Eridanus** covers a large area: from the left foot of **Orion** “Captain of Host: Fights Tyranny” towards **Cetus** “Beast from the Sea: Shaman” then to the nether region of the Southern-most sky.

The brightest star (1<sup>st</sup> magnitude) at the very bottom is **Achernar** “The After Part of the River”. The next brightest star is **Cursa** “Bent Down” and not far past it is **Zourac** “Flowing”.

There is a loop where **Eridanus** is pulled East by the foot of **Cetus**. Satan diverts the River, as if to hold back the Day of Judgment, but he fails: the river flows on its journey down, down to darkest lost eternity without Christ.

**Achernar** is the 9<sup>th</sup> most bright star in the heavens. The spiritual number 9 means “JUDGEMENT”.

**HISTORICAL EVENTS**

**Plato** was the West’s most influential philosopher. He founded the first school of ‘higher learning’. His pupil **Aristotle** laid the foundation for science: empiricism (believe nothing unless demonstrated by observation): this is also the core tenet of Atheism.

387 BC **Plato’s Academy** is founded in Athens: a school of skeptical thought: knowledge of things is impossible: man cannot discern truth and error: we must therefore suspend all judgment.

367 BC **Aristotle** studies at **Plato’s Academy**. He will become the teacher to Alexander the Great and made many contributions to science & philosophy

Science was unfortunately joined at birth to Atheism: it seems impossible to have science without unbelief. This is tragic because the pursuit of science is fruitful in human development. Unfortunately, **Atheism** blazes a path to the Luciferian lie: “I Am God”.

Greek philosophy under the cloak of science teaches men there is no God; result: modern education has produces countless unbelievers. Ultimately: the Western World will go to hell for ignoring the testimony of the Bible & the commands of Jesus.
